Shreyash Agare

Product Design Engineer

Mumbai, India | +91 91362 74396 | shreyashagare26@gmail.com | shreyashagare.in | github.com/ShreyashAgare26 | linkedin.com/in/shreyash-agare

Product designer who takes the work to production. Open-source contributor to FleetDM & Penpot. I design B2B real-estate software used daily by sales teams and home buyers, then **direct the build with AI and own what ships**: the front end, the QA, and the call on what gets built. I research with the people who use it, find the failure the feature was sold on, and fix it in the data model rather than the wording.

EXPERIENCE

Product Design Engineer — **Jan 2026 – Present**

Envision Next (Briqhaus) · Mumbai, Hybrid

- Design, front end and QA across **seven modules** of a real-estate CRM in one year: an AI agent, a RERA knowledge base, meeting minutes, two admin dashboards, call analysis and channel partner campaigns. All shipped into a product already in daily use, with developers brought in during design to check feasibility.
- Built the **design system** under an inherited interface: one Figma library of tables, states and empty screens, so seven modules ship as one product.
- Designed and shipped **Meeting MOM**, an AI meeting tool now running **15 to 40 meetings a week**. User testing found a third of action items named the wrong person; traced it to per-segment speaker labelling, fixed it in the transcription call and made owners editable records.
- Designed a **Flutter buyer portal** (in Play Store review) giving home buyers their payments, documents and construction progress without phoning a salesperson.
- Designed and shipped **two production websites solo in about a week each** on Next.js and Payload CMS, built with AI and reviewed and QA'd by me, so marketing and a compliance team edit their own copy with no deploy and no developer.

Design Intern — **Nov 2025 – Mar 2026**

Tequity Tech · Mumbai, Hybrid

- Designed user flows, wireframes and UI screens for a SaaS product, with interactive prototypes and animations used to communicate intent to developers and clients.
- Contributed to design system documentation for handoff, and supported user research.
- Built pitch decks and presented design work directly to clients and stakeholders.

Design Intern — **May 2023 – Jun 2023**

Leap for Word (NGO) · Mumbai

- Designed website layouts and social media assets against the brand strategy.

SELECTED PROJECTS

Meeting MOM · AI meeting minutes · Design and delivery · Three weeks to first client meeting
Returns minutes with every action item pinned to whoever owes the work. The model drafts; a person signs off before anything leaves the building.

Raahi · Behavioural design · Research + prototype · Fifty drivers interviewed
A voice companion that talks long-distance drivers into breaks instead of alarming them. Prototyped on Arduino and tested with the drivers it was for.

SKILLS

Open Source · Contributor to **FleetDM** and **Penpot** (front-end UI fixes, component updates, and design system refinements).

Design · User research, information architecture, interaction design, design systems, wireframing, prototyping, usability testing, accessibility (WCAG), system and service design, design QA.

Ships with · React, Next.js, Rails, Flutter, HTML, CSS, Payload CMS, Postgres, REST APIs, Git. AI-assisted build; I scope it, review it and test it.

Tools · Figma, FigJam, Adobe Creative Cloud, Framer, Webflow, Miro, Claude Code, ChatGPT, Blender.

Collaboration · Developer walkthroughs, design handoff, stakeholder presentation, client communication, cross-functional delivery.

EDUCATION

B.Des, Humanizing Technology 2022 – 2026

NMIMS School of Design · Mumbai · CGPA 3.38 / 4.0

- Shortlisted at the **India HCI 2024** student design competition and winner at the **NMIMS Research Symposium 2024**, for a user research project on consumer discard behaviour.
- Sole recipient of the **Punctuality & Reliability Award**, Class of 2026.
